

Antimicrobial surface treatments

Product groups: 089 New buildings (generation 4), 102 Renovation (generation 2)

The declaration applies to construction products used in Nordic Swan Ecolabelled applications.

Name of the product
Manufacturer
Type of construction product

The declaration is completed and signed by the manufacturer of the construction product, based on their knowledge at the time of the declaration, and based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling.

Does the construction product contain *nanoparticles* or biocide treatments with the purpose of creating an antibacterial or antiviral surface or effect? Yes No

Nanoparticles means a natural, incidental or manufactured material consisting of solid particles that are present, either on their own or as identifiable constituent particles in aggregates or agglomerates, and where 50% or more of these particles in the number-based size distribution fulfil at least one of the following conditions:

- I. one or more external dimensions of the particle are in the size range 1 nm to 100 nm;
- II. the particle has an elongated shape, such as a rod, fibre or tube, where two external dimensions are smaller than 1 nm and the other dimension is larger than 100 nm;
- III. the particle has a plate-like shape, where one external dimension is smaller than 1 nm and the other dimensions are larger than 100 nm.
